CLASS A FIRE RATED

IN TWO SIZES!

ShingleVent® II-7 
7-INCH CLASS A FIRE RATED

ShingleVent® II-9 
9-INCH CLASS A FIRE RATED

There's two great things about Air Vent's 7-inch and 9-inch **ShingleVent II Class A** shingle-over ridge vents:

- 1) They're fire rated for Class A roof decks.
 - 2) They still have the advanced design of other Air Vent ridge vents including the external baffle and internal weather filter for superior airflow performance and weather protection.
- For enhanced ridge cap shingles, cedar shake, cedar shingle and tile applications.
 - 16 square inches of net free area per linear foot.
 - Built-in external baffle deflects wind up and over the ridge enhancing airflow performance.
 - Internal weather filter provides protection against weather and insect infiltration.
 - Less than 7/8 inches tall on the ridge making them virtually invisible from the ground.

 **AIR VENT INC.**

**FOR ENHANCED RIDGE CAP SHINGLES
CEDAR SHAKE, CEDAR SHINGLE
AND TILE APPLICATIONS.**

CLASS A

They're fire rated for Class A roof decks in accordance with UL standards for ICC approval. They're the only externally baffled Class A fire rated shingle-over ridge vents available.

LOW PROFILE

There is no need for unsightly roof vents.

SUPERIOR AIR CONTROL

External baffle design creates airflow pattern that actually "pulls" air from the attic and deflects rain, snow and insects.

INTERNAL WEATHER FILTER

The unique filter system helps stop entry of rain, snow and insects while allowing continuous airflow which prevents clogging. Unlike a furnace filter it's made of unwoven, untreated fiberglass.

DURABLE HIGH DENSITY COPOLYMER

Strong but flexible in cold temperatures, stable in heat.

EASY TO INSTALL

Preformed to a 4/12 roof pitch, ShingleVent II-7 Class A and ShingleVent II-9 Class A work well on roof pitches from 3/12 to 12/12.

COLOR COORDINATED

They come in an attractive charcoal color that coordinates with most roof colors.

BACKED BY AIR VENT

Both vents have a lifetime, limited warranty and are covered by Air Vent's Replacement Plus™ protection.

CODE COMPLIANCE

ShingleVent II-7 Class A and ShingleVent II-9 Class A are UL listed. Call Air Vent for latest code numbers.

SHINGLEVENT II-9

A BALANCED RIDGE VENT SYSTEM

Air Vent offers a number of quality, durable and versatile intake vents to balance the ridge vent system.

**Undereave
Vents**

**Continuous
Soffit Vents**

**Pro Flow™
Vented Drip Edge**

Lifetime Warranty and Replacement Plus™ Protection

ShingleVent II-7 Class A and ShingleVent II-9 Class A are backed by a lifetime, limited, transferable warranty and are covered by our exclusive Replacement Plus™ protection. Replacement Plus provides reimbursement for all labor costs incurred in removing any defective vent and installing the vent replacement in addition to the replacement product itself. That's protection you can count on.

Important: For best appearance, run the ridge vents to the ends of the roof.
